Summary

Motivated and detail-oriented Fresher MERN Stack Developer with hands-on project experience in building responsive, full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Strong understanding of RESTful APIs, JavaScript (ES6+), and modern web development practices. Eager to contribute to a dynamic development team and grow as a software engineer.

Technical Skills

Languages: JavaScript, HTML5, CSS3, C, C++, Python(Basic)

Frontend: React.js, Redux, Bootstrap

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, VS Code, npm, Vercel

Concepts: REST APIs, JWT Authentication, MVC Architecture, Responsive Design, Basic SEO Knowledge

Projects

GlowEssence (Group Project)

MERN Stack

- Collaborated in a 4-member team to build a full-stack e-commerce platform for a clean beauty brand using React, Redux Toolkit, Node.js, Express, and MongoDB, supporting three distinct roles: shopper, seller, and admin.
- Worked with JWT-based authentication and bcrypt password hashing alongside role-based middleware, restricting sellers to managing only their own products and enabling secure access control across all API routes.
- Contributed to shopper-facing features including live product filtering, sorting, pagination, cart/wishlist management, and multi-item checkout with real Razorpay payment integration verified via server-side signature checks.
- Helped build a seller dashboard for product/category management and sales analytics, and an admin dashboard with platform-wide metrics and visual charts for revenue and top-selling products.

- GitHub: github.com/kashishsevak/GlowEssence.git

E-Commerce Web Application

Node.js, Express, MongoDB

- Developed a full-stack e-commerce platform with user authentication, product catalog, cart, and order management.
- Implemented RESTful APIs using Express.js and Node.js, with MongoDB for data persistence.
- Built a responsive UI and integrated secure authentication and role-based access control.
- GitHub: github.com/kashishsevak/pr-e-commerce-nodejs

Blog Application

MERN Stack

- Built a full-stack blogging platform allowing users to create, edit, and manage blog posts.
- Designed RESTful backend APIs with Express.js and MongoDB for storing posts and user data.
- Developed a responsive and interactive frontend using React.js.
- GitHub: github.com/kashishsevak/kashish-blog-pr

Education

Vidhyadeep University

2025 – 2028 (Pursuing)

Bachelor of Science in Information Technology (B.Sc. IT) – 2nd Year

Certifications

- Full Stack Development with MERN – Certificate of Excellence, thingQbator Program (Nasscom Foundation & Ziksha)
- TECHWAR 2026 – Certificate of Participation, C Tsunami Competition, Red & White Skill Education
